

CEILING-KIT FOR SUSPENDED MOUNTING

general information

Especially designed for Infrapower infrared heaters, the VCIR-C-02 allows Infrapower infrared heaters to be mounted on the ceiling where a lower height is desired. Infrared heaters should not be mounted higher than 3m above the floor in order to work effectively. The supplied chains allow a variable distance between 5 and 50 cm from the ceiling. The kit enables following mounting options:

- parallel to the floor when the ceiling is slanted.
- a slanted mount from flat ceilings.

The kit is compatible with all aluminum-framed Infrapower infrared heaters .

kit content

- 4 ring-screws
- 4 threaded hooks
- 4 chains (50cm a piece)
- 4 shackle pins

technical details

ARTICLE NUMBER	VCIR-C-02
PACKAGE SIZE	15 × 22 × 3,5cm
WEIGHT	0,35 kg
PRODUCT SIZE	50 cm
COMPATIBLE WITH FOLLOWING MODELS	

VCIR-60-90-350

VCIR-60-90-500

VCIR-60-90-700
